**THIS LAMP  
HAS A STORY**

# IT'S FISHED OUT OF THE CANALS

Every year, thousands of people roll-up their sleeves and take to the Amsterdam canals to come plastic fishing with Plastic Whale.

Businesses come fishing with their teams, citizens join our public events, kids learn about plastic soup, tourists experience the city in a different way.

They all want to make the world a better, cleaner place and support our mission for plastic-free waters.

# IT'S TRASH TURNED INTO TREASURE

We collect more than 40,000 PET bottles alone per year! PET plastic is both versatile and valuable. The bottles we collect are turned into flakes and fibers which are made into recycled PET felt used in our Barnacle lamps.

# IT'S A DESIGNER PIECE

Our Barnacle lamps, designed by LAMA Concept, get their shape from the barnacles found living on the skin of a whale. They are made from pressed recycled PET felt and take LED filament bulbs to minimize energy usage.

LAMA

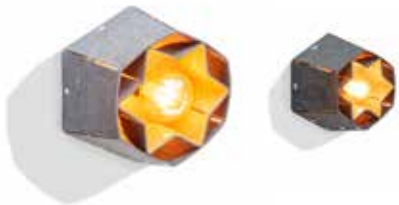

# IT'S HANDCRAFTED IN THE NETHERLANDS

Together with Vepa we create beautiful circular furniture, right here in the Netherlands. Besides using recycled PET bottles, Vepa also makes optimal use of other waste streams at their factory. Nothing goes to waste. At the end of a product's life, parts are reused and recycled to give it another lease of life.

# IT'S YOUR CHOICE

Our Barnacle lamps can be used separately or together to create the perfect lighting effect for every situation. On their own, or as a stunning ceiling or wall installation - the choice is all yours!

# IT'S ONE OF THE FAMILY

Our Barnacle lamps are part of the Plastic Whale by Vepa collection including the Whale boardroom table, Whale Tail chair, and Whale panel. All made from recycled PET bottles fished out of the Amsterdam Canals.

Together we can achieve our mission for plastic-free waters.
