

WHALE PANEL

The acoustic panels, whose fluent lines are subtly reminiscent of the pleats on a whale's throat, are made entirely from pressed recycled PET felt. The panels are also available with LED lighting to create a truly striking effect.

Materials

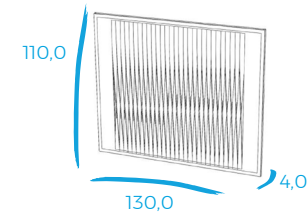

- acoustic panel made from PET felt, available in dark and light grey felt
- made from 196,8 PET bottles
- optional with RGB LED backlight, remote controlled
- back panel: PEFC European beech plywood
- French cleat system ensures easy wall mounting
- seamless frame, finished with environmentally friendly solvent-free black powder coat

Quality Labels

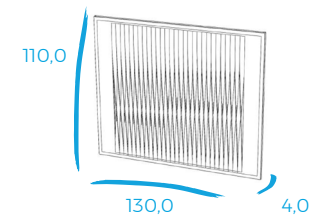

- back panel: PEFC European beech plywood
- felt: 60% recycled PET bottles
- felt: Oeko-Tex certified
- felt: REACH and RoHS compliant
